One of the areas in which HWA International excels is in connectivity. We think it is important for you to choose the companies you would like to do business with, and let our technology serve that decision.

If you are interested in connecting electronically with another software product, we would be happy to build an interface that exactly fits your needs.

We have experience in building interfaces with the following companies and government agencies. We realize that some of the names below have since been involved in mergers. The main purpose of the list is to show the breadth of our experience. Every name on this list represents a potential building block for future projects.
