

TRUSTprocessor

Hardware & Software Requirements

SERVER HARDWARE:

Pentium 2GB processor or faster
1GB RAM minimum
100 GB hard drive RAID Level 1,5 or 10
48x CD-ROM
Tape backup device or external USB hard drive with appropriate backup software

SERVER OPERATING SYSTEM:

Windows 2000 Server SP4 or
Windows Server 2003 or
Advanced Server SP2 or
Windows Small Business Server 2003 (includes SQL Server)

SERVER DATABASE SOFTWARE:

SQL Server 2000 Standard Edition SP3a or higher

WORKSTATION HARDWARE:

Pentium 1GB processor or faster
1 GB RAM minimum (add more to increase performance)
40 GB hard drive (minimum 4 GB free)
SVGA monitor (1024 x 768 resolution)
100baseTX network card recommended for best performance
48x CD-ROM

WORKSTATION OPERATING SYSTEM:

Microsoft Windows 2000 Professional SP4 or
Microsoft Windows XP Professional SP2 or
Microsoft Windows Vista Business (32-bit version)

(Note: Other versions of Windows, i.e. 3.X, 95, 98, ME, NT, or XP Home are not a suitable replacement for this requirement. We have not validated operations with the 64-bit Windows Vista, and do not recommend this version.)

A broadband Internet connection

Please see the separate document for hardware and software specifications relating to TPonline.
